international journal of forecasting

Author Index Volume 13 (1997)

(The issue number is given in parentheses)

Adams, P.D. and **P.B. Dixon,** Generating detailed commodity forecasts from a computable general equilibrium model (2) 223–236
Anderson, E.A., *see* **Gardner, E.S.** (4) 501–508
Astatkie, T., D.G. Watts and **W.E. Watt,** Nested threshold autoregressive (NeTAR) models (1) 105–116

Bewley, R., Editorial: The forecast process and academic research (4) 433–436
Brace, C., *see* **Ramanathan, R.** (2) 161–174

Camus, R., G.E. Cantarella and **D. Inaudi,** Real-time estimation and prediction of origin–destination matrices per time slice (1) 13– 19
Cantarella, G.E., *see* **Camus, R.** (1) 13– 19
Chabchoub, H., *see* **Oral, M.** (4) 527–537
Chen, C., Robustness properties of some forecasting methods for seasonal time series: a Monte Carlo study (2) 269–280
Clements, M.P. and **J. Smith,** The performance of alternative forecasting methods for SETAR models (4) 463–475
Clements, M.P. and **D.F. Hendry**, An empirical study of seasonal unit roots in forecasting (3) 341–355
Cobbett, M.R., *see* **Dougherty, M.S.** (1) 21– 31

De Gooijer, J.G. and **P.H. Franses**, Forecasting and seasonality (3) 303–305
De Romph, E., *see* **Van Der Zijpp, N.J.** (1) 87–103
del Moral, M.J. and **M.J. Valderrama,** A principal component approach to dynamic regression models (2) 237–244
Dixon, P.B., *see* **Adams, P.D.** (2) 223–236
Dougherty, M.S. and **M.R. Cobbett,** Short-term inter-urban traffic forecasts using neural networks (1) 21– 31
Dougherty, M.S., *see* **Kirby, H.R.** (1) 43– 50
Dowd, M.R. and **J.P. LeSage,** Analysis of spatial contiguity influences on state price level formation (2) 245–253

Elango, B., *see* **Lee, M.-S.** (1) 127–135
Engle, R., *see* **Ramanathan, R.** (2) 161–174

Flores de Fruto, R., *see* **Novales, A.** (3) 393–405
Franses, P.H. and **M. Ooms,** A periodic long-memory model for quarterly UK inflation (1) 117–126
Franses, P.H., *see* **De Gooijer, J.G.** (3) 303–305
Franses, P.H., *see* **Paap, R.** (3) 357–368
Funke, M., Supply potential and output gaps in West German manufacturing (2) 211–222

García-Ferrer, A. and **R.A. Queralt,** A note on forecasting international tourism demand in Spain (4) 539–549
Gardner, E.S. and **E.A. Anderson**, Focus forecasting reconsidered (4) 501–508
Garside, S., *see* **Whittaker, J.** (1) 51– 61
Glosser, S.M. and **L. Golden,** Average work hours as a leading economic variable in US manufacturing industries (2) 165–195
Golden, L., *see* **Glosser, S.M.** (2) 165–195
Granger, C.W.J., *see* **Ramanathan, R.** (2) 161–174

Harvey, D., S. Leybourne and **P. Newbold,** Testing the equality of prediction mean squared errors (2) 281–291
Hendry, D.F., *see* **Clements, M.P.** (3) 341–355
Herwartz, H., Performance of periodic error correction models in forecasting consumption data (3) 421–431
Hoek, H., *see* **Paap, R.** (3) 357–368
Hounsell, N.B. and **S. Ishtiaq,** Journey time forecasting for dynamic route guidance systems in incident conditions (1) 33– 42
Hylleberg, S. and **A.R. Pagan**, Seasonal integration and the evolving seasonals model (3) 329–340

Inaudi, D., *see* **Camus, R.** (1) 13– 19
Ishtiaq, S., *see* **Hounsell, N.B.** (1) 33– 42

King, M.L., *see* **Kulendran, N.** (3) 319–327

Elsevier Science B.V., Amsterdam

Kirby, H.R., *see* **Van Arem, B.** (1) 1– 12
Kirby, H.R., S.M. Watson and **M.S. Dougherty,** Should we use neural networks or statistical models for short-term motorway traffic forecasting? (1) 43– 50
Kulendran, N. and **M.L. King**, Forecasting international quarterly tourist flows using error-correction and time-series models (3) 319–327

Lee, H.S. and **P.L. Siklos,** The role of seasonality in economic time series. Reinterpreting money-output causality in U.S. data (3) 381–391
Lee, M.-S., B. Elango and **S.P. Schnaars,** The accuracy of the Conference Board's buying plans index. A comparison of judgmental vs. extrapolation forecasting methods (1) 127–135
LeSage, J.P., *see* **Dowd, M.R.** (2) 245–253
Leybourne, S., *see* **Harvey, D.** (2) 281–291
Lindveld, K., *see* **Whittaker, J.** (1) 51– 61
Lisi, F. and **A. Medio**, Is a random walk the best exchange rate predictor? (2) 255–267

Medio, A., *see* **Lisi, F.** (2) 255–267
Muste, M.(Rik), *see* **Van Arem, B.** (1) 73– 85

Newbold, P., *see* **Harvey, D.** (2) 281–291
Novales, A. and **R. Flores de Fruto,** Forecasting with periodic models. A comparison with time invariant coefficient models (3) 393–405

Önkal-Atay, D., *see* **Wilkie-Thomson, M.E.** (4) 509–526
Ooms, M., *see* **Franses, P.H.** (1) 117–126
Oral, M. and **H. Chabchoub**, An estimation model for replicating the rankings of the world competitiveness report (4) 527–537

Paap, R., P.H. Franses and **H. Hoek**, Mean shifts, unit roots and forecasting seasonal time series (3) 357–368
Pagan, A.R., *see* **Hylleberg, S.** (3) 329–340
Parigi, G. and **G. Schlitzer,** Predicting consumption of Italian households by means of survey indicators (2) 197–209
Pollock, A.C., *see* **Wilkie-Thomson, M.E.** (4) 509–526

Queralt, R.A., *see* **García-Ferrer, A.** (4) 539–549

Ramanathan, R., R. Engle, C.W.J. Granger, F. Vahid-Araghi and **C. Brace**, Short-run forecasts of electricity loads and peaks (2) 161–174
Reimers, H.-E., Forecasting of seasonal cointegrated processes (3) 369–380
